Lucton Public Rights of Way

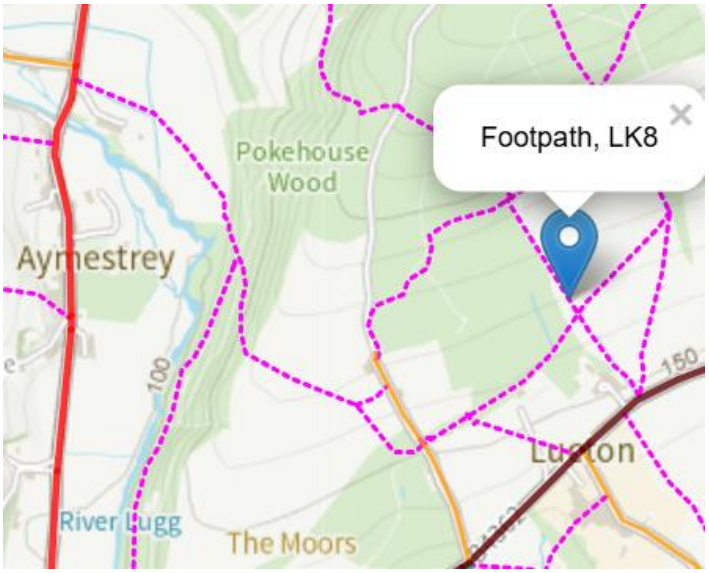

Report received from a resident.

LK5 overgrown & fallen trees.

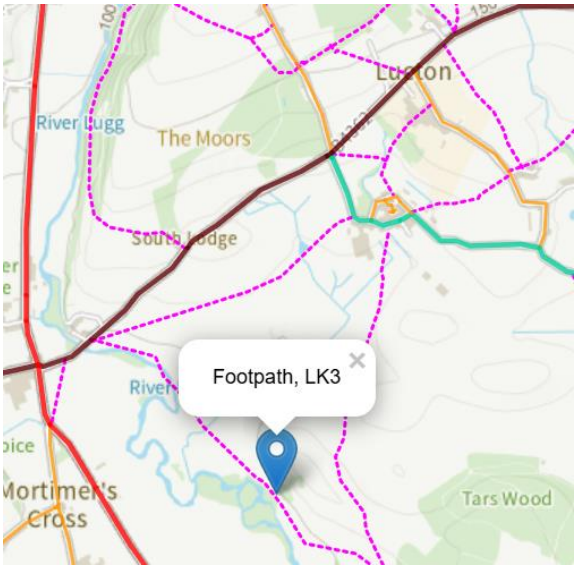

LK6 and LK8 overgown.

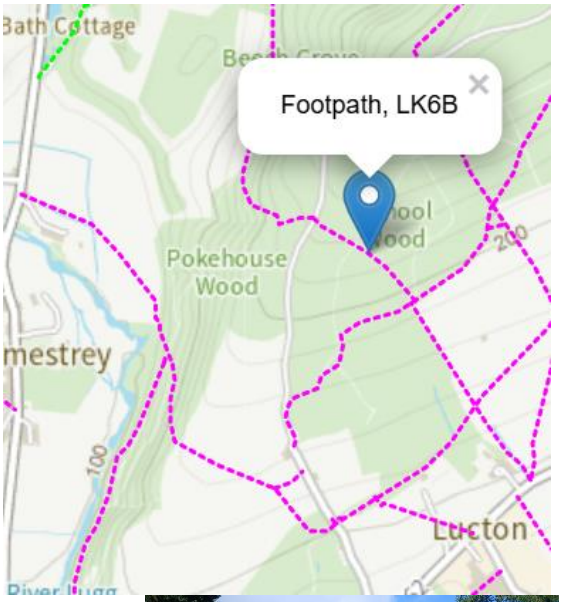

Some of the others have freed up a bit after harvesting.

Footpaths LK3 along the river has been unofficially blocked off on the footbridge, with an alternative route that is impassable offered instead. Some of the waymarking arrows have been removed. Don't know what the excuse is for the closure.

Report from Cllr Di Hill

We walked LK6 & LK6B through School Wood.

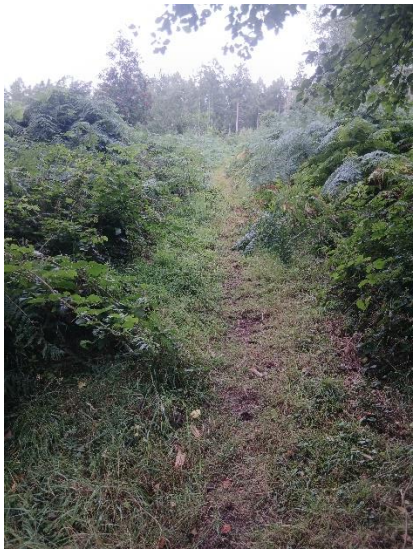

Some paths were a little overgrown, mainly with blackberries & bracken. A couple of trees were across one path.

We cleared the paths we walked, they were not previously impassable.

There was some evidence of recent clearing. Visitors to the café mentioned they had just cleared the growth on the Mortimer trail. One person was responsible for Aymestrey to the fort.
