Herefordshire Council

Herefordshire Council is offering climate resilient trees to Parish and Town Council's for **free** (with stake, natural tree tie, bio spiral guard, and bio weed mat) to be planted on land owned by your Council (not highways i.e. streets), local park (Charity owned, Council-endorsed) and schools within your parish.

The tree selection is based on a combination of Kew Gardens and tree nurseries research into drought tolerant trees and availability for this upcoming planting season. Please take some time to consider your location and choose a suitable tree to be enjoyed by your community for many years to come.

Name	Mature height, spread and shape		Ideal location	Deciduous/ evergreen	Key Features	Photo
Tulip Tree *Liriodendron tulipifera*	**Large** **25-30m height x 10-15m spread** Broadly pyramidal when young, becoming oval to rounded		Parks, open space, large greens	Deciduous	Distinctive tulip-shaped leaves, green-yellow tulip-like flowers, attractive yellow autumn colour, fast-growing specimen tree. **Tree supplied in 45L container, 2-3m tall.**
